Professional Experience

Experience gained in work done for assessment purposes during my undergraduate and master's degrees and some personal projects.

ITSector — Frontend Engineer / Consultant SI (2023 – Present)

- Frontend Engineer working on enterprise-level applications for Millennium BCP using React, TypeScript and Redux.
- Currently involved in the development of the Millennium Corporate Website in a large-scale Agile environment.
- Collaborating directly with business stakeholders to deliver scalable and user-focused solutions.
- Contributing to reusable frontend components, application maintainability and performance improvements.
- Working within cross-functional teams and multiple frontend squads in a complex enterprise ecosystem.

E-goi — Fullstack Web Developer (2021 – 2023)

- Worked as a Fullstack Web Developer contributing to new features, application improvements and bug fixing.
- Developed frontend interfaces using AngularJS and TypeScript while also contributing to backend services in PHP.
- Worked with Docker, MySQL and modern web technologies in a product-oriented environment.
- Collaborated in Agile teams and participated in the full development lifecycle.

INOVA+ — Software Engineering Internship / Project (2020)

- Developed and redesigned interfaces for an agricultural platform based on the open-source FarmBot solution.
- Worked with React, TypeScript and Docker during the internship/project experience.
- Improved usability and frontend structure of the existing platform.
- Collaborated in Agile teams and participated in the full development lifecycle.
